## NIHR Theme: Mental health

The NIHR 2018 Themed Call is 'Promotion of good mental health and the prevention or treatment of mental ill health' across the whole life course.

NIHR welcomes proposals for clinical and applied health research that evaluate healthcare interventions, health services, social care or public health measures operating at either the individual, or the population level. Issues of particular interest include proposals that utilise new digital health technologies or investigate their effects.

The remit for this call includes conditions listed in the Health Research Classification System (HRCS) category '[Mental Health](#)'. Studies may include individuals with co-morbidities included in HRCS category '[Neurological](#)', provided the main focus remains the mental health condition.
